

PAYMENT MACHINES

RFID RANGE

**CONTROL SYSTEM
WITH CHIP TECHNOLOGY**

RFID RANGE

MACHINES WITH AN RFID SYSTEM provide a comprehensive solution for managing and controlling showers, charging stations, door locks, electrical appliances, or barriers using user RFID tokens. Each user is equipped with an RFID token, which serves for access or service use across multiple devices simultaneously.

**SHOWER PANELS AND
SHOWER CONTROL**

**SHOWER CONTROL WITH RFID

FOR BARRIERS**

SLZA 30E 89309 24 V DC

PROGRAMMING AND CHARGING STATIONS

- Essential part for controlling the entire system
- Serves as a controller for setting up and programming the system
- Used to create individual tokens
- Enables three levels of authorized access for service staff (administrator, extended, basic), as defined by the administrator
- Used for charging and topping up credit on user tokens
- Enables export of information on the number of token top-ups to PC

SETTING TOKEN

The manufacturer creates a setting token based on customer specifications.

- Configures individual devices to the required parameters (e.g., the number of credits used for a certain length of showering, use of a TV, or activating the washing machine program)

PAIRING TOKEN

The manufacturer creates a pairing token.

- Pairs and connects individual devices (shower controls, washing machines, doors, etc.) to the programming station, creating a single closed system where only tokens charged at the designated charging station will function. Tokens from neighboring campsites will not work here.

CREDIT READERS

SLZA 30CZ

Built-in credit reader. Used to check the remaining credit on a token.

SLZA 30C

Wall-mounted credit reader. Used to check the remaining credit on a token.

USER TOKEN

The operator (system administrator) creates user token profiles on the programming station, for example:

- Standard user token
- VIP user token – e.g., for staff – access to all devices for free
- User token for disabled people or parents with children – grants access to specially designed spaces

TOKEN CONFIGURATION OPTIONS

At the programming station, the desired number of credits can be loaded onto the user's token, with one credit corresponding, for example, to 1 EUR. The user then pays for the use of showers, washing machines, hairdryers, etc., by deducting individual credits from the token when using the device.

It is also possible to set up device activation without deducting credits, such as for entry into the premises, door access, etc. A major advantage is that a single token can be used for multiple devices throughout the entire stay. The token can be recharged at the facility's service desk during the stay.

COIN AND TOKEN MACHINES for showers

COIN AND TOKEN MACHINES for showers

COIN AND TOKEN MACHINES FOR SHOWERS are devices that regulate time or payment for shower use. These machines can use tokens or the following coins: 1 and 2 EUR. Acceptance of other currencies upon request.

**SHOWER MACHINES,
PANELS**

**RECESSED COIN AND TOKEN
SHOWER TIMER FOR ONE
TO THREE SHOWERS**

SLZA 01LNZ 88018 24 V DC

CONTROL OPTIONS

INTERACTIVE CONTROL

- The user can freely turn the water on and off directly in the shower using a button on the stainless steel panel, making this version more efficient, as in most cases, water consumption is lower compared to direct control.
- 30 seconds before the showering time ends, the user is warned by a short water flow interruption, signaling the approaching end of water supply.

DIRECT CONTROL

- After a preset delay, the automat will start the water for the paid time without the possibility of stopping it.
- 30 seconds before the showering time ends, the user is warned by a short water flow interruption, signaling the approaching end of water supply.

SHOWER SELECTION OPTIONS

USER-SELECTED SHOWER

- Before inserting a coin or token, the user selects the desired shower by pressing a button.

USER-SELECTED SHOWER FROM MENU

- The user selects the shower number on the display and confirms the selection by inserting a coin or token.

AUTOMATIC SHOWER SELECTION

- After inserting a coin or token, the system automatically assigns a shower and briefly turns on the water as an indicator of the assigned shower.

COIN AND TOKEN MACHINES

COIN AND TOKEN MACHINES

COIN AND TOKEN MACHINES are devices designed for self-service use of single-phase appliances (hairdryers, washing machines, dryers, stoves, televisions, etc.) and door locks, where the service activation requires inserting a coin or token. The machines can use the following coins: 1 and 2 EUR. Acceptance of other currencies upon request.

COIN AND TOKEN MACHINES

COIN AND TOKEN MACHINES FOR DOOR LOCK

SLZA 40G

SLZA 40GV

COIN AND TOKEN MACHINE FOR DOOR OPENING, FOR 12 V LOCK

SLZA 40	88400	24 V DC
SLZA 40V	88404	euro key, 24 V DC

- AISI - 304, brushed finish

COIN AND TOKEN MACHINE FOR DOOR OPENING WITH GSM MODULE, FOR 12V LOCK

SLZA 40G	88402	24 V DC
SLZA 40GV	88406	euro key, 24 V DC

- SMS message about full cash register, including the possibility of reporting the current balance
- AISI - 304, brushed finish

SLZA 40GZ

SLZA 40GVZ

RECESSED COIN AND TOKEN MACHINE FOR DOOR OPENING, FOR 12 V LOCK

SLZA 40Z	88401	24 V DC
SLZA 40VZ	88405	euro key, 24 V DC

- mounted into the wall
- AISI - 304, brushed finish

RECESSED COIN AND TOKEN MACHINE FOR DOOR OPENING WITH GSM MODULE, FOR 12V LOCK

SLZA 40GZ	88403	24 V DC
SLZA 40GVZ	88407	euro key, 24 V DC

- mounted into the wall
- SMS message about full cash register, including the possibility of reporting the current balance
- AISI - 304, brushed finish

COIN AND TOKEN MACHINES FOR SINGLE-PHASE APPLIANCES

COIN AND TOKEN MACHINE FOR SINGLE-PHASE APPLIANCES

SLZA 41	88410	for washing machine, hairdryer, TV, etc., 230 V AC, 24 V DC
---------	-------	-------------------------------------------------------------

- AISI - 304, brushed finish

RECESSED COIN AND TOKEN MACHINE FOR SINGLE-PHASE APPLIANCES

SLZA 41Z **88411** for washing machine, hairdryer, TV, etc., 230 V AC, 24 V DC

- mounted into the wall
- AISI - 304, brushed finish

COIN AND TOKEN MACHINE FOR TWO TO EIGHT SINGLE-PHASE APPLIANCES

SLZA 04L **88040** for washing machine, hairdryer, TV, etc., 230 V AC, choice by the user, 24 V DC

- AISI - 304, brushed finish

RECESSED COIN AND TOKEN MACHINE FOR TWO TO EIGHT SINGLE-PHASE APPLIANCES

SLZA 04LZ **88041** for washing machine, hairdryer, TV, etc., 230 V AC, choice by the user, 24 V DC

- mounted into the wall
- AISI - 304, brushed finish

AUTOMATIC DEVICES, MULTIPLE PAYMENT METHODS

AUTOMATIC DEVICES, MULTIPLE PAYMENT METHODS

COMBINED PAYMENT MACHINES support payments via coins and tokens, RFID tokens, as well as contactless payments using credit cards, Google Pay, or Apple Pay. These are universal devices designed for regulating and charging for showering, electricity consumption for appliances, or charging for access to facilities.

- Available with Euro lock for free access for disabled individuals.
- Parameter settings and communication with electronics via APP SANELA CONTROL (Bluetooth)

AUTOMATIC DEVICE, MULTIPLE PAYMENT METHODS

SLZA 43A	88438	for 1 - 4 door locks, 24 V DC
SLZA 43AV	88439	for 1 - 4 door locks, euro key, 24 V DC
SLZA 43B	89430	for 1 - 4 single-phase appliances, 24 V DC
SLZA 43S	89432	for 1 - 4 showers, 24 V DC

- AISI - 304, brushed finish

SET OF PARTS FOR INSTALLATION OF SLZA 43XX INTO THE WALL

TOKEN-OPERATED SHOWER panels

TOKEN-OPERATED SHOWER panels

TOKEN-OPERATED SHOWER PANELS are a practical and reliable solution for public facilities such as campsites, sports centres, and hostels. They enable efficient control of water and energy consumption through the use of a token, providing simple and intuitive operation.

SHOWER PANELS

**TOKEN-OPERATED,
WALL-MOUNTED SHOWER PANEL**

SLZA 29

89290

24 V DC

Only SLZA 52 tokens can be used with these machines, and they are inserted into the shower panel.

- The user can freely turn the water on and off directly in the shower using a button on the stainless steel panel.
- In the last third of the showering time, the user is warned by a short water flow interruption, signaling the approaching end of water supply.
- If the entire facility is rented out, the panel can be switched to FREE MODE.

SLZA 28

SLZA 29

SLZA 29T

SET OF 50 PCS TOKENS FOR SHOWER PANELS

SLZA 52 88520 SLZA 28, SLZA 29, SLZA 29T

BENEFITS OF PAYMENT MACHINES

- **Maximum operational cost savings**
- **Water and energy consumption under control**
- **Custom-tailored project solutions**
- **Fast return** on investment for purchased equipment
- **Resistance to damage** – anti-vandal design (selected types)
- **Continuous, unattended operation**
- **Easy to use**
- **Increased hygiene standards**
- **Multiple payment methods** available for users
- **Parameter settings and electronic communication** via the Sanela Control mobile application

USES OF PAYMENT MACHINES

HOW PAYMENT MACHINES CAN BE USED

- For showers
- For electricity consumption for appliances (hairdryers, washing machines, stoves, televisions, etc.)
- For access control, including vehicle entry and door opening
- For charging electric bikes and other devices

WHERE PAYMENT MACHINES ARE USED

- Campsites, recreational, or accommodation facilities
- Fitness and wellness centers
- Public laundromats
- Swimming pools
- Companies
- Public restrooms
- Parking lots and rest areas
- Gas stations
- Sports arenas
